

Magnetic Oil Level Indicator

Brand:

Product Code: DTSA

Availability: 2 - 3 Days

Weight: 0.00kg

Dimensions: 0.00mm x 0.00mm x 0.00mm

Short Description

Oil level indicators

Description

This accessories have 2 main part that called float and indicator. There is no mechanical connection between float and indicator. The float, which moves with the lifting force of the oil, moves the oil level indicator by the magnetic way.

This type of oil level indicators provide sealing against the positive and negative pressure under +110 C temperature and 0.5 bar pressure. Indicator and related parts which are not inside the tank can continue to work -25 C up to +60 C environmental temperature. The float and related parts which are directly contact to the oil can work under +110 C temperature.
